

# WALK OF LIGHT

ILLUMINATED DRAINAGE CHANNELS FROM HAURATON

An aerial, top-down view of a city street at night. The street is paved with dark, irregular cobblestones. Two horizontal strips of glowing green LED lights run across the street, one near the top and one near the bottom. In the upper right corner, the heads and shoulders of two people are visible. In the lower right corner, a person in a dark shirt and green pants is walking away from the camera. In the lower left corner, a woman in a vibrant, multi-colored (yellow, green, and blue) dress is dancing or moving. The overall scene is illuminated by the green lights and ambient city light, creating a vibrant, futuristic atmosphere.

AND THE CITY BECOMES COLOURFUL  
SIMULTANEOUSLY ILLUMINATING AND DRAINING WITH HAURATON

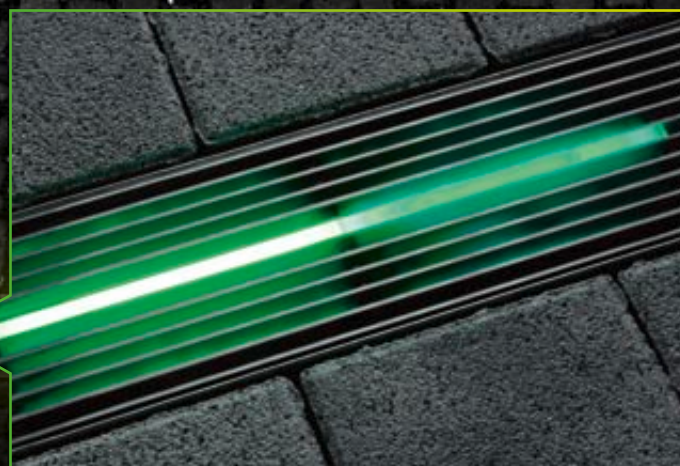

## ... BUILDINGS AND PLACES LIGHT UP...

### OUR MODELS WITH LOTS OF CHARISMA

Leisure facilities, piazza's, courtyards and places requiring aesthetic illumination as well as drainage. Our gratings have integral LED-illuminates that can be individually inserted to add definition and outline to the drainage area.

### AT A GLANCE

- ✓ Illuminates and drains simultaneously
- ✓ Available for all loading capacities
- ✓ Versatile design possibilities

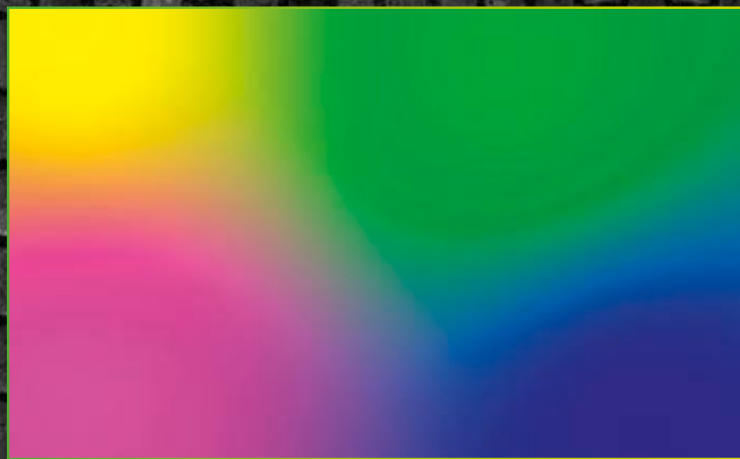

# ...COLOURFUL RAYS DANCING THROUGH THE NIGHT...

## **COURAGE TO COLOURS**

We can deliver an individual lighting system incorporating any colour from the RGB-Spectrum. With the addition of control devices, the frequency and duration of colour displayed can be set remotely for the whole run of channel. This makes the design scope endless.

## **THE RGB COLOUR SPECTRUM**

## ...AND EVERYTHING APPEARS IN A NEW LIGHT.

### **EASY INSTALLATION**

The illuminated drainage systems can be specified as FASERFIX SUPER KS Channels and installed by any Civil or Landscaping contractor. The LED illumination elements come pre-installed in the gratings and are simply connected via a plug. The gratings are secured using our unique boltless locking system SIDE-LOCK.

Additional information for the locking system can be found in our Civils catalogue.

### **MOISTURE PROTECTION AND SECURITY**

All connections for the LED illuminates are sealed and water tight so that no moisture can enter the system. The system is connected to an external power supply and utilises energy saving 12 volt electricity.

### **COMPATIBILITY**

The illuminated drainage systems are compatible with all products and accessories from the FASERFIX SUPER KS 100 range.

### FURTHER EXAMPLES

Any grating from the FASERFIX SUPER KS 100 range can be utilised with this system and adapted for your requirements. Alternative system sizes can be produced on demand.

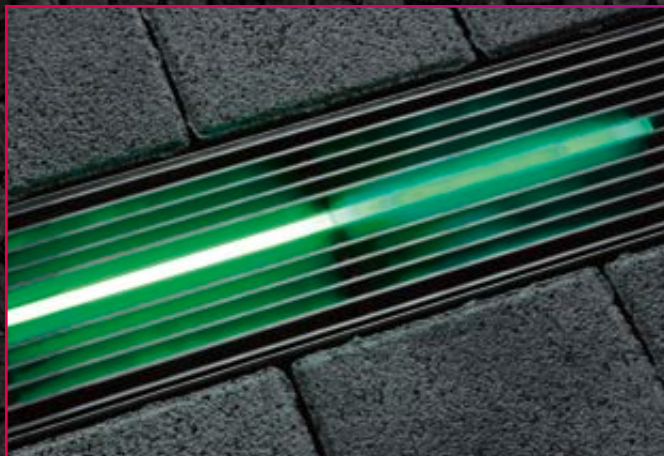

GUGI-Ductile iron mesh grating

Slotted grating

Ductile iron grating

Longitudinal slot grating

Mesh grating

**APPLICATION EXAMPLES**

Illuminated drainage systems are suitable for ...

... high profile private, public and commercial buildings

... as definition between contrasting surface finishes

... public places
